

Information Crib Sheet

Internet access

What is business grade internet?

Nowadays every business requires access to the internet in one form or another. Business grade internet is faster, more secure and robust than standard domestic internet. It often provides internet access for multiple end users and is specifically designed not to slow in high peak use compared to the domestic internet.

Types of internet available to businesses

iCS customers benefit from managed internet access ranging from 256KB up to 1GB or, to put it another way, broadband up to a dedicated link.

All of our products are delivered across dedicated business grade networks so you are not fighting for bandwidth with consumers downloading media and Skyping across the world. We have a range of the latest ADSL2+ products that can deliver up to 24MB.

We also offer multi-site solutions ranging from MPLS, WANs, networks and VPLS, to short haul high bandwidth links designed to seamlessly connect office networks together.

We offer:

- ADSL MAX
- ADSL 2+
- ANNEX-M
- Fibre to the Cabinet (FTTC)
- Fibre to the Premises (FTTP)
- Ethernet First Mile (EFM)
- Ethernet (Fibre)

Why choose iCS?

iCS works with some of the biggest names in telecoms and internet providers to bring you the best services. iCS is also your main contact, so instead of sitting in lengthy call queues with big national call companies you simply call us and we'll do all of the hard work on your behalf.

We also offer LAN, Wi-Fi and mobile broadband solutions.

Call iCS today to see what speeds and services we can offer in your area
